

WINDOW OPERATION GUIDE

For step-by-step video tutorials, please visit the [Champion Windows & Home Exteriors YouTube channel](#).

OPERATING AWNING WINDOWS

Awning Windows are hinged at the top and open outward from the bottom, allowing for ventilation. This page will take you through 4 easy steps on how to operate your awning window.

Step 1

Locate the locks on each side of the frame. One at a time, unlock the window by pushing upward on the locks.

Step 2

At the bottom of the window, pull the crank out of the pocket and turn the crank until the window is open to your liking.

Step 3

When you are ready to close the window, turn the crank the opposite way until the window is closed and place the crank back into the pocket.

Step 4

Pull the latches back down that are on each side of the frame to lock the window.
